

Entered Employment Rate Performance Measures
Program Year 2011-12 to 2015-16

California (Statewide) WIA Title I Adult Funding Negotiated Performance Levels			
Program Year	Entered Employment Rate	Entered Retention Rate	Average Earnings (6 mos.)
2015-16	64.2%	82.0%	\$14,573
2014-15	64.2%	82.0%	\$14,573
2013-14	63.4%	83.0%	\$14,200
2012-13	59.0%	81.0%	\$13,700
2011-12	56.4%	81.0%	\$13,000

The Increasing Skills and Credential Attainment Workgroup

The members of the workgroups agreed in January to wrap up its work this spring with a meaningful, concrete, deliverable: A concise (4-page) state framework addressing "industry-recognized credentials." Everyone -- from feds to locals, education to industry -- is talking about these, but there is much confusion as to what these include, how they are developed, and why they matter (not to mention how we actually use them to calibrate supply and demand in regional labor markets). A short policy statement from the Board outlining just that would be a critical first step to getting at the broader goals of the state plan.

Three members are currently reviewing a first draft, which will be quickly revised and reviewed by the Working group as a whole. The WorkGroup would then present the final version to the full board as soon as possible.
