

## SOME IMPORTANT WAYS TO PLAN FOR EMERGENCIES FOR ALL CITIZENS!

If there is an emergency such as fire, earthquake, or flood that requires you to leave your home or work, there are free mass communication systems where all land-line telephones will automatically be called with a recorded message, to tell you what to do and where to go. However, if you want to receive the same information by text messages on your *cell phone* or by *email*, you must register those. Then if there is an emergency in or near your zip code that your cell phone or email is registered to, you would be notified. REGISTER TODAY!

If you live in the **City** of Los Angeles,  
register with **NOTIFY L.A.** at the link below:

<http://emergency.lacity.org/EOOperations/NotifyLA/index.htm>

If you live in the **County** of Los Angeles,  
register with **ALERT L. A. County** at the link below:

<http://alert.lacounty.gov/>

*For both of these systems, you need the internet to register. If you don't have a computer with internet or if you need help, ask a family member, friend, or caregiver!*
